

## **Flexagon's FlexDeploy 3.0 in the Oracle Cloud Marketplace – Available 10/25/15**

**Oracle Cloud customers can use FlexDeploy to help create more repeatable and efficient software development and delivery processes, speeding time to market, improving quality, and reducing cost**

**Green Bay, Wisconsin – October 8, 2015**

### **News Facts**

Flexagon, a leading provider of DevOps and Continuous Delivery Software and Gold level member of Oracle PartnerNetwork (OPN), today announced that its FlexDeploy 3.0 solution will soon be available in the [Oracle Cloud Marketplace](#) offering added value to Oracle Fusion Middleware, Oracle Applications and Oracle Cloud customers. [FlexDeploy](#) automates the build, deploy, test and release processes for Oracle Fusion Middleware and Oracle Applications on premise and in the Oracle Cloud. FlexDeploy replaces manual and scripted processes with those that can be repeatable, high-quality, and cost-effective.

The Oracle Cloud Marketplace is a one-stop shop for Oracle customers seeking trusted business applications and service providers offering unique business solutions, including ones that extend Oracle Cloud Applications. [Oracle Cloud](#) delivers the industry's broadest suite of enterprise-grade public cloud services, including data as a service (DaaS), software as a service (SaaS), platform as a service (PaaS), and infrastructure as a service (IaaS).

"FlexDeploy running on Oracle Cloud can make it easier for customers and partners to focus on software applications versus the infrastructure and tooling required to build, deploy, test, and release their solutions effectively. For example, running FlexDeploy on Oracle Java Cloud Service can help remove the need to manage and administer the underlying Infrastructure, Database, and WebLogic implementation. In addition, the FlexDeploy plugin for Oracle Java Cloud Service can optimize capacity utilization by starting and stopping Oracle Java Cloud Service instance from within a FlexDeploy workflow," said Dan Goerd, President, Flexagon. "Flexagon's participation in the Oracle Cloud Marketplace further extends our commitment to the Oracle community and enables customers to easily reap the benefits of FlexDeploy. We look forward to leveraging the power of the Oracle Cloud to help us achieve our business goals."

The Oracle Cloud Marketplace offers an intuitive user interface to browse and search for available applications and services, as well as provides user ratings and reviews to help customers determine the best business solutions for their organization. With its new automated application installation features, customers can easily deploy provider business applications from a centralized cloud interface.

### **About Flexagon**

Flexagon provides high quality and cost effective products and services related to DevOps, Continuous Delivery, Oracle Fusion Middleware, and Oracle Cloud. Our FlexDeploy solution helps automate the software delivery lifecycle and improves the productivity, quality, and cost of software development and delivery.

**About Oracle PartnerNetwork**

Oracle PartnerNetwork (OPN) Specialized is the latest version of Oracle's partner program that provides partners with tools to better develop, sell and implement Oracle solutions. OPN Specialized offers resources to train and support specialized knowledge of Oracle products and solutions and has evolved to recognize Oracle's growing product portfolio, partner base and business opportunity. Key to the latest enhancements to OPN is the ability for partners to differentiate through Specializations. Specializations are achieved through competency development, business results, expertise and proven success. To find out more, visit <http://www.oracle.com/partners>.
