

DevOps for Oracle E-Business Suite and Cloud

Dan Goerdt, President
June 2022
Ascend, Las Vegas

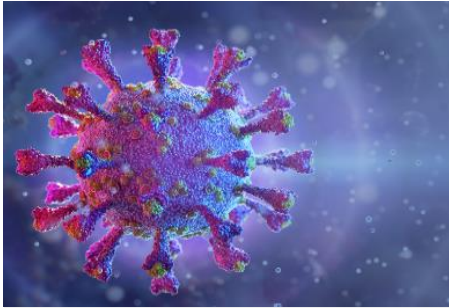

Agenda

1. Challenges
2. FlexDeploy Solution Overview
3. Demo
4. Q&A

What is Stopping You from Delivering?

What Is Causing the Complexity?

Increased Expectations

Business demand intensified due to urgent, monumental response by technology teams during the pandemic.

Ever-Expanding Tech

Adoption of new architectures, cloud services, applications, and middleware that support the entire development lifecycle.

Deep-Rooted Systems

Ever-expanding tech landscape is combined with existing intricate, deep-rooted legacy systems.

Disparate Toolchain

Teams struggle to manage and support the plethora of tools adopted to streamline the development and delivery workflow.

True Business Impact

Need to demonstrate comprehensive visualizations of business impact beyond DevOps standard metrics.

The image shows a modern office space. On the left, there's a staircase with a metal railing. Below it, a large bookshelf is filled with books. In the foreground, there's a wooden chair with a black seat, a small round table, and a display board with various documents. The room has a high ceiling with exposed wooden beams and a large window on the right side.

Global Office Furniture Manufacturer Comforted by Modern, Simplified Processes

- Organization and technology footprint increased need for scalable development and delivery
- Manual and scripted processes were error-prone, time-consuming and limited visibility across the lifecycle
- Security risk was heightened due to lack of maintenance and control over system access

A modern office interior featuring a prominent staircase with a metal railing and wooden steps. To the left, there are tall metal bookshelves filled with books. In the foreground, a wooden chair with a black seat and a small round table are visible. The floor is made of large, dark grey tiles. The overall atmosphere is professional and contemporary.

Complete IT Environment

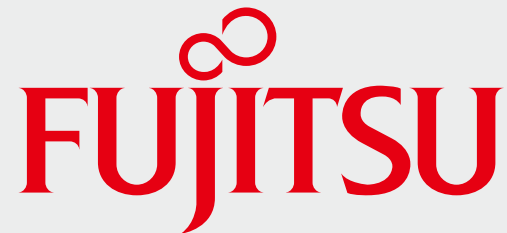

- Oracle Cloud Infrastructure
- Oracle E-Business Suite
- Oracle SOA Suite
- Oracle Service Bus
- Oracle Business Intelligence
- Oracle Integration Cloud
- Oracle Analytics Cloud
- Informatica ETL
- Microsoft
- ADP
- Salesforce

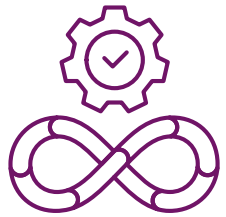

Single Platform: Automation, Governance, and Visibility Across the Toolchain, with OOTB COTS support

- Seamless Delivery: 98% reduction in deployment-related errors
- Lifecycle Control: 90% reduction in audit review hours for deployments
- Automate Everything: 90% productivity gain by removing manual tasks

OUR Mission

We make it **simple** for enterprises **to drive** continuous innovation through **quality software**.
Achieving more customer value, lower cost and less risk.

The FlexDeploy DevOps Platform

Tailor to Your Unique Delivery Pipeline.

100+ Integrations, Plugins and Solutions

Secrets Management	Source Control	Build, CI, Repo	Test & Quality	Infra as Code	Monitoring	Cloud	Applications
  	  	   	       	  	   	        	         
Agile and Service Management	ChatOps	   	Containers	  	DB and BI		

FLEXAGON™

FlexDeploy® Support for Oracle

Database and Dev Tools	Middleware	Cloud Applications	Cloud Infrastructure
Database	WebLogic	SaaS ERP	Containers
PL/SQL	JMS	SaaS HCM	API Platform
APEX	SOA	SaaS SCM	Integration
ORDS	OSB	SaaS BI (OTBI)	Analytics
JET	MDS	SaaS BI Publisher	Visual Builder
JDeveloper	B2B	CX Commerce	OBIEE
ADF	MFT	CX CPQ	Database
utPLSQL	BPM	E-Business Suite	APEX
OATS	ODI	PeopleSoft	Java
Forms	WebCenter	Siebel	SOA

Oracle E-Business Suite

- Automate deployment of 25+ objects like AOL, Java, SQL, and Reports
- Apply ADOP patching for R12.2
- Manage EBS application tier servers
- Post-clone data refresh optimizations
- Data fix automation and controls
- Deploy only changed objects
- Support EBS on premises and on Oracle Cloud Infrastructure (OCI)

Oracle SaaS Fusion Applications

- Available for SaaS ERP, HCM, SCM
- Automate Functional Setup Migration
- Scoped Setups, Value Sets, Fast Formula
- Source from Git or SaaS environment
- Automate Oracle Business Intelligence objects (OTBI) and BI Publisher reports
- Deploy only changed objects

Oracle Integration Cloud

- Automate deployment of integrations, connections, lookups, libraries
- Source from Git or directly from an OIC development environment
- Trigger actions from the OIC Studio using a browser extension
- Deploy only changed objects
- Automate the Config File deployments
